

Test and prepare to share

Name: _____

Date: _____ Period: _____

Use your choice pages to record three runs, change one thing, and test three more times. Keep results from runs that did not work.

Write your handover directions

Set up the test area:

Start the program:

Stop the robot:

Return to the start safely:

Show what you learned

Give a two-minute demonstration. If it fails, stop safely, explain what happened and show your earlier results.

Our robot's job and how the code works:

A change we made, with a result from before and after:

My part in the team's work:

Another team's feedback and one next test:

Program and first tests

Name: _____

Date: _____ Period: _____

- 1. Start with movement stopped. Use a checked low speed, such as 20 percent.
- 2. Drive forward for 0.8 seconds, then stop and end. Shorten the time if the paper is too small.
- 3. No automatic repeat. Lift the marker and return the robot by hand between runs with the power off.

My prediction:

Run	Visible line?	Stayed on paper?	Stopped by itself?
1			
2			
3			

Improve your chosen build

What counts as success?

- ☐ A visible line is drawn on the paper.
- ☐ The marker stays in its holder and all marks stay on protected paper.
- ☐ The robot stops by itself at the programmed time.

Change one thing. What did you change?

Run	Visible line?	Stayed on paper?	Stopped by itself?
1			
2			
3			

How did marker height change the line or the robot’s movement?

Which result supports your answer?
